Index to Subjects—Volume 17, 1988

Current Microbiology

© Springer-Verlag New York Inc. 1988

Acetone-butanol fermentation, iron effect on, 299
Achlya ambisexualis, presence of DNA sequence homologous to *RAS* gene in, 183
Acholeplasma laidlawii, activity of dihydrofolate reductase in, 351
Acinetobacter strains, carbonate crystal formation by, 221
Acquired immune deficiency syndrome (AIDS), inhibition of *Mycobacterium avium* strains growth, 121
Actinobacillus pleuropneumoniae, serological properties of, 305
Actinomadura angiospora, structure of tetrahydrogenated menaquinone, 275
Adherence of canine *E. coli* and *Proteus mirabilis* to epithelial cells, 333
Adherence of human *E. coli* and *Proteus mirabilis* to epithelial cells, 333
Agaricus bisporus, protoplasting/regeneration system for, 285
Agaricus bitorquis, protoplasting/regeneration system for, 285
Agrobacterium radiobacter, behavior of R388*rep*(Ts)::Tn5 in, 293
Agrobacterium tumefaciens, behavior of R388*rep*(Ts)::Tn5 in, 293
Ammonium, inhibition of nitrate uptake, 1
Amperometric method, monitoring anaerobic respiration, 95
Amylase, cloned into transposon Tn5, 69
Anabaena doliolum, nitrate uptake and photosynthesis in, 1
Anaerobic heterotrophic bacteria, in feces of different mammals, 33
Anaerobic respiration, monitoring by amperometric method, 95
Antibody response, to serotypes 1 through 5 of *Actinobacillus pleuropneumoniae*, 305
Aquaspirillum magnetotacticum, iron reduction by, 339
Azotobacter vinelandii
  change in fluorescence of oxidation and reduction of flavin and pyridine nucleotides, 209
  siderophore mutants of, 343
Azotobactin, siderophore of *Azotobacter vinelandii*, production of, 343
Azotochelin, siderophore of *Azotobacter vinelandii*, production of, 343

Bacillus sphaericus
  bacteriophage attachment to surface layer proteins of, 55
  mosquito-pathogenic strains of, 55
Bacillus thuringiensis, expression of insecticidal crystal protein gene, 347
Bacillus thuringiensis kurstaki, gene coding for entomocidal proteins, 5
Bacteriophage attachment, to surface layer proteins, 55
Bacteriophage neutralization, 55
Bacteroides fragilis, growth yields in basal medium, 13
Bacteroides gingivalis, chemically defined media for, 147
β-Glucosidase, cloned into transposon Tn5, 69
β-Lactams, selective binding to individual penicillin-binding proteins, 139
Betaine, effect on growth and oxidation of *Thiobacillus ferrooxidans*, 255
Bradyrhizobium japonicum, growth and respiration, 89
Bromobenzene, in a chemostat, microbial adaptation to, 99
Butanol production, from glucose, effect of iron limitation on, 299

Calcium carbonate precipitation, by halophilic microorganisms, 221
Candida utilis, isolation of variant of, 43
Cannibalism, study of recognition mechanisms, 203
Catechol, role in degradation of 2-fluorobenzoate, 249
Cerulenin, inhibition of *Mycobacterium avium* growth, 121
Clindamycin, resistance in *Streptococcus pneumoniae*, 167
Clostridium acetobutylicum, glucose fermentation to butanol in, 299
Clostridium botulinum, zinc stimulates sporulation in, 193
Cluster analysis
  use for screening and clustering antibodies, 127
  use with monoclonal antibodies for taxonomic differentiation of phytopathogenic fungi, 127
Co-metabolism, degradation of xenobiotic chemicals by, 99
Coagglutination test, serotyping of *Actinobacillus pleuropneumoniae* strains, 305
Colloidal ferric hydroxide (CIH) method, 235
Concanavalin A, distribution unrelated to virulence or pathogenicity of bacterial strain, 235
Copper, role in sporulation in *Clostridium botulinum*, 193
Cowpea *Rhizobium*, iron siderophore involvement in molybdenum transport in, 179
Culture media, effect on structure and adherence of lactobacilli, 159

Deleya halophila strain, production of phage, 49
Denitrification, role of nitrogen oxides, 89
Desulfovibrio vulgaris, iron binding in vesicles of, 189
Dictyostelium caveatum, genetic characterization of cannibalism in, 203
6-Difluorodihydrodihydroxybenzoate, role in degradation of 2-fluorobenzoate, 249
Dihydrofolate reductase, activity in *Acholeplasma laidlawii* and *Mycoplasma gallisepticum*, 351
DNA-DNA hydridizations, 183
DNA-RNA hybridizations, 183

Electron cytochemistry of mycobacteria, 235
Elongation, of *Escherichia coli*, effect of *wee* genetic system, 315
Enolase, purification and characterization of, 265
Enzyme-linked immunosorbent assay (ELISA), 127
Epithelial cells, adhesion of canine and human uropathogenic strains to, 333
Erwinia carotovora, behavior of R388*rep*(Ts)::Tn5 in, 293
Erythromycin, resistance in *Steptococcus pneumoniae*, 167
Escherichia coli
  canine and human uropathogenic, adhesion to canine and human epithelial cells, 333
  location of *rg1B* gene of, 269
  purification and characterization of enolase from, 265
  role of superoxide anions in inactivation of, 117
  secretory expression system of, 321
  segregation of elongation potential in, 315
  transformation, 19
Euglena gracilis, ultraviolet-B inhibition of motility in, 215
Expression levels, of toxin genes in *Bacillus thuringiensis*, 5

Faenia rectivirgula, structure of tetrahydrogenated menaquinone, 275
Flavins
  enhances iron reduction, 339

oxidation and reduction from carbon and hydrogen metabolism, 209
Flavobacterium strains, carbonate crystal formation by, 221
Fluorescence, study of oxidation and reduction of flavins and pyridine nucleotides, 209
2-Fluorobenzoate, degradation of by a pseudomonad, 249
3-Fluorocatechol, role in degradation of 2-fluorobenzoate, 249
Freeze substitution technique, development of, 151, 159
Fremyella diplosiphon, plasmid DNA of, 23
Fusebacterium varium, glucose utilization and growth response, 229

Genetic mapping
of *rgIB* gene of *Escherichia coli*, 269
of *wee* gene of *Escherichia coli*, 351
Glucose uptake, in strains of *Fusebacterium* species, 229
Glutamic acid, effect on growth and oxidation of *Thiobacillus ferrooxidans*, 255
Group B streptococci
differences between human and bovine isolates, 77
virulence strain variations, 77
Growth phase, effect on structure of lactobacilli, 159

Halophilic microorganisms, study of effect of ionic strength of medium on calcium carbonate precipitation, 221
Heme, effect on growth yields of *Bacteroides fragilis*, 13
High performance liquid chromatography, 5
Human granulocyte-macrophage colony stimulating factor, expressed in *Escherichia coli*, 321
Hydrogen peroxide, sensitivity of *Escherichia coli* to, 117

Inoculum preparation method, 243
Insecticidal crystal protein gene, expressed in *Bacillus thuringiensis*, 347
Ionized ferritin (CF) method, 235
Iron-binding agents, modulation of bactericidal action of serum complement with *Legionella*, 111
Iron oxidation, stimulation of by proline and betaine in *Thiobacillus ferrooxidans*, 255
Iron reductase activity, in *Aquaspirillum magnetotacticum*, 339
Iron siderophore, interaction with molybdenum in cowpea *Rhizobium*, 179
Iron uptake, by lipopolysaccharides and outer membrane proteins, 189

Klebsiella oxytocia, construction of transposons encoding genes from, 69

L-Cysteine, sulfur production in α-spores, 259
Lactobacillus casei
adherence to epithelial cells, 159
grown in agar and under batch and chemostat culture conditions, structure of, 151
morphology of strains, 159
Lambda specialized transducing particles, construction and genetic characterization of, 269
Legionella pneumophila, killing by human serum and iron-binding agents, 111
Lipopolysaccharides, from *Serratia marcescens* strains, 27

m-Cresol-degrading methanogenic consortia, culture methods for obtaining, 83
Menadione, effect on growth yields of *Bacteroides fragilis*, 13
Menaquinone, tetrahydrogenated, structure of, 275
Mercaptopyruvate sulfurtransferase, sulfur production in α-spores, 259
Methanogenic bacteria, in feces of different mammals, 33
Methionine-sulfoximine, effect on nitrate uptake and photosynthesis, 1
Methotrexate, resistance to by *Acholeplasma laidlawii* and *Mycoplasma gallisepticum*, 351
Microcystis aeruginosa, plasmids in toxic and nontoxic strains of, 133
Microorganisms, bromobenzene use as source of carbon and energy, 99
Molybdenum, interaction with siderophore in cowpea *Rhizobium*, 179
Monoclonal antibodies, clustering of, use in taxonomic differentiation of phytopathogenic fungi, 127
"Moraxella" (Oligella) urethralis, identification of, 281
Moraxella osloensis, identification of, 281
Mycobacterial growth, enhancement by polyoxyethylene stearate, 105
Mycobacterium aurum, model for cytochemical methods, 235
Mycobacterium avium
cytochemical characterization of, 235
effect of mycoside C biosynthesis on outer wall architecture of, 61
reversal of cerulenin inhibition of by octanoate, 121
Mycobacterium bovis, enhanced growth by polyoxyethylene stearate, 105
Mycobacterium tuberculosis
cytochemical characterization of, 235
enhanced growth by polyoxyethylene stearate, 105
radiometric susceptibility testing of, 243
Mycoplasma gallisepticum, activity of dihydrofolate reductase in, 351
Mycoside C biosynthesis, inhibition of amino acids, 61

Nitrate uptake, effect of methionine-sulfoximine on, 1
Nitrogen-limited continuous culture, isolation of *Candida utilis* variant, 43
Nitrous oxide, as terminal electron acceptor, 89

O14 antiserum, agglutination of lipopolysaccharides, 27
Octanoate, reversal of cerulenin inhibition of *Mycobacterium avium* by, 121
Osmoregulation of chemolithotrophs under salt stress, 255
Outer membrane proteins
incorporation into *Desulfovibrio vulgaris*, iron uptake, 189
of mutants of *Azotobacter vinelandii*, 343

Paracoccus denitrificans, respiration by, with nitrous oxide as terminal electron acceptor, 95
Penicillin-binding proteins, of *Rhodospirillum rubrum*, 139
Phagocytosis, study of, cannibalism, 203
Phomopsis viticola, α-spores of, sulfur production from L-cysteine in, 259
Phormidium luridum
plasmid profiles and homology, 37
study of plasmid DNA, 37
Photodynamic reactions, 215
Photosynthesis, effect of methionine-sulfoximine on, 1
Plasmid curing, gene coding in *Bacillus thuringiensis*, 5
Plasmid DNA
of chromatically adapting *Fremyella diplosiphon*, 23
of filamentous, nonheterocystous cyanobacteria strains, 37
Plasmids
in clinical isolates of *Streptococcus pneumoniae*, 167
in strains of *Microcystis aeruginosa*, 133
screening in transformed yeast strains, 19
Plectonema boryanum
isolation, purification, and cloning of, 37
plasmid profiles and homology, 37
Polygalacturonate *trans*-eliminase, cloned into transposon Tn1721, 69

Polyoxyethylene stearate, enhancement of mycobacterial growth, 105
Proline, effect on growth and oxidation of *Thiobacillus ferrooxidans*, 255
Protein hydrolysates
  growth response of *Fusebacterium* species to, 229
  supplements in minimal medium for *Bacteroides gingivalis*, 147
Proteus mirabilis, canine and human uropathogenic, adhesion to canine and human epithelial cells, 333
Protoplasting/regeneration system, for *A. bisporus* and *A. bitorquis*, 285
Pseudomonas
  degradation of 2-fluorobenzoate, source of carbon and energy, 249
  role in study of use of bromobenzene as sole carbon and energy source, 99
Purification method, 265
Pyridine nucleotides, oxidation and reduction from carbon and hydrogen metabolism, 209

R-plasmids, characterization in environmental isolates of *Salmonella*, 173
R388*rep*(Ts)::Tn5, behavior in various organisms, 293
Radiolabeled amino acids, 61
Radiometric susceptibility testing, 243
Radiometric techniques in mycobacteriology, 105
RAS gene, DAN sequence homologous to in *Achlya ambisexualis*, 183
Recognition mechanisms, study of, cannibalism, 203
Restriction map, of plasmid DNA, 23
Rhizobium meliloti, behavior of R388*rep*(Ts)::Tn5 in, 293
Rhodospirillum rubrum, penicillin-binding proteins, 139
Ring precipitation test, serotyping of *actinobacillus pleuropneumoniae* strains, 305

Saccharomyces cerevisiae, transformation, 19
Saccharothrix australiensis, structure of tetrahydrogenated menaquinone, 275
Salinity, effect on the stability and replication of phage, 49
Salmonella, R-plasmids in environmental isolates of, 173
Salmonella typhimurium lipopolysaccharide, iron binding in, 189
Salt concentration, effect on calcium carbonate precipitation by halophilic microorganisms, 221
SDS-PAGE, study of lipopolysaccharides of *Serratia marcescens* strains, 27
Serratia marcescens, lipopolysaccharide heterogeneity in strains of, 27
Serum, inhibitory effect on growth of *Legionella pneumophila*, 111
Siderophore mutants, of *Azotobacter vinelandii*, 343
Sporangiogenesis, role of DNA sequence in *Achlya ambisexualis*, 183
Sporulation
  role of copper in *Clostridium botulinum*, 193
  role of zinc in *Clostridium botulinum*, 193
Streptococcus pneumoniae, plasmids in clinical isolates of, 167
Sucrose-negative serotype 03 strains, isolation and pathogenicity, 199
Sulfate, effect on metabolism of *m*-cresol in sewage sludge enrichments, 83
Sulfide, effect on metabolism of *m*-cresol in sewage sludge enrichments, 83
Sulfur production, in dormant α-spores of *Phomopsis viticola*, 259
Superoxide anions, inactivation of *E. coli* induced by hydrogen peroxide, 117
Surface layer proteins, bacteriophage attachment to, 55

Taxonomic differentiation, of phytopathogenic fungi, 127
Terminal electron acceptor, role of nitrogen oxides, 89, 95
Tetracycline, resistance in *Streptococcus pneumoniae*, 167
Thin layer chromatography, 61
Thiobacillus ferrooxidans, osmoregulation of by proline and betaine, 255
Transposons
  construction of, 69
  expression in gram-negative bacteria, 69
Trimethoprim, resistance to by *Acholeplasma laidlawii* and *Mycoplasma gallisepticum*, 351

Ultraviolet-B radiation, effect on motility of *Euglena gracilis*, 215
Urogenital epithelium
  growth of *Lactobacillus* species, 151
  lactobacillus adherence to, 159

Voges-Proskauer-negative serotype 03 isolates, 199

Yersinia enterocolitica, isolation of sucrose-negative strains of, 199
Yersinia kristensenii, differentiation from *Y. enterocolitica*, 199

Zinc, role in sporulation in *Clostridium botulinum*, 193
